CONTROLS

① **Fan Speed Indicator**
Indicates the current fan speed.

② **Change Filter Indicator**
LED light indicates when it is time to change the filter.

③ **Reset Button**
After replacing a filter, press the RESET button for at least 5 seconds.

④ **Air Quality Indicator**
Color-coded LED indicates one of three levels of air quality.

⑤ **Power Button**
Turns the unit on or off .

⑥ **Fan Speed Button (UP/DOWN)**
Enables Manual operation of the unit. Press to cycle through and set the desired fan speed (Low, Medium, High).

⑦ **Light Sensor**
Detects the amount of ambient light within the environment, to adjust the brightness of the LED indicators.

WHERE TO USE

Allow 30 - 45 cm. of space between TVs, radios, and other electronic products electromagnetic interference from certain electronics may cause product malfunction.

Place indoors away from direct sun light
direct exposure may cause product malfunction or failure.

Only place on hard, flat surfaces
flimsy or slanted surfaces may result in abnormal noise and vibrations.

WARNING Follow these instructions to reduce the risk of serious injury or death and to reduce risk of damaging the unit.

- Do not use around mist or fumes from industrial oil or around large quantities of metallic dust.
- Do not place around heating elements.
- Do not install in any sort of motor or transport vehicle (trucks, boats, ships, etc).
- Do not place in an area with excessive amounts of noxious gases.
- Do not place near any flammable materials (aerosols, fuel, gases etc).
- Do not have unit facing into wind or draft.
- Do not place below any electrical outlet.
- Do not place in excessively humid areas where unit may become wet.

※ This unit is not intended to be used to preserve documents or in art conservation.

ZERO-N.indb 5 2018-04-26 오후 5:38:47

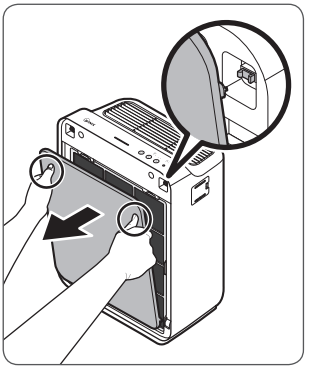

INSTALLING FILTERS

This product comes with all required filters. The protective plastic wrap must be removed from the filter before use.

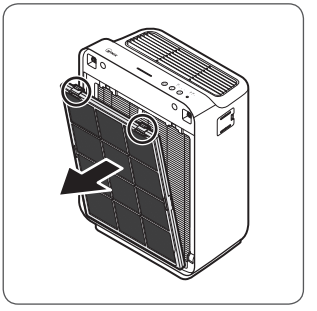

※ Operating the unit without removing the plastic wrap may result in product failure.

※ Unplug and make sure the unit is turned off before installing filter.

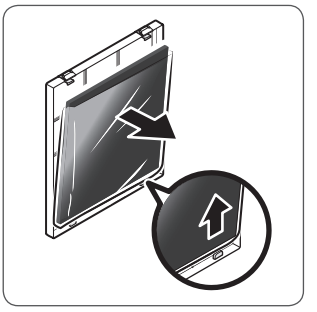

① Remove the front panel by pressing down on both edges of the front and gently pulling it toward the front.

② Press on the Pre-filter tabs near the top of the filter, release and remove.

③ Remove the carbon filter from the filter case.

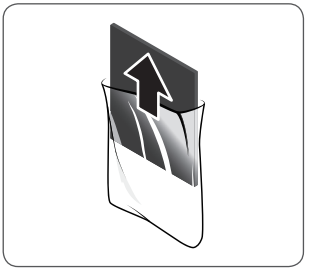

ZERO-N.indb 6 2018-04-26 오후 5:38:50

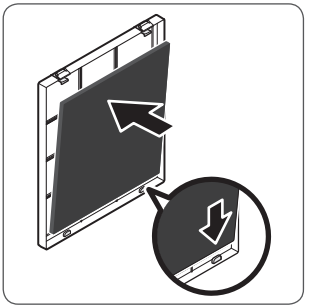

INSTALLING FILTERS

④ Remove filters from protective plastic wrap.

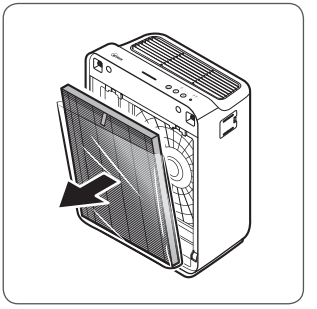

- Operating the unit without removing filters from plastic wrap may cause abnormal noise, deformation, or fire as a result of overheating.

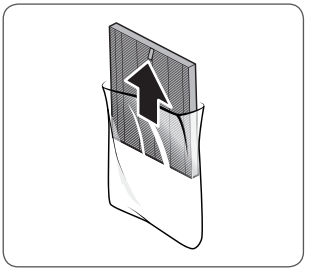

⑤ After removing the packing vinyl of the filter, insert the carbon filter into the filter case.

⑥ Pull out the True HEPA filter.

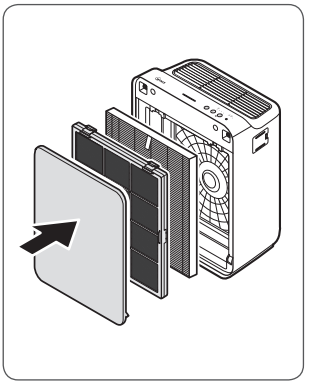

⑦ Remove the filter case, then remove the True HEPA filter.

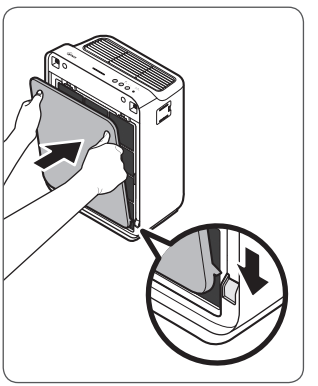

ZERO-N.indb 7 2018-04-26 오후 5:38:51

INSTALLING FILTERS

⑧ Ture HEPA filter → Filter case in order, pushing it in close to the back of the product.

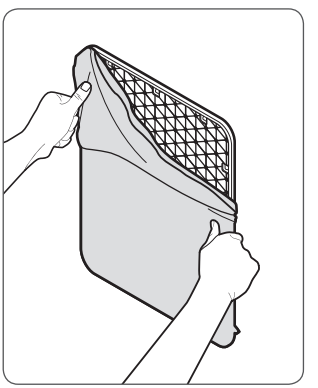

⑨ After inserting both ends of the fabric pre filter, press both sides of the top to close it.

⑩ Remove the fabric pre filter that is fastened to the front panel.

- The fabric pre filter is secured by the 12 hooks on the back of the front panel.

ZERO-N.indb 8 2018-04-26 오후 5:38:54

INSTALLING FILTERS

When to service and replace filter:

Filter	Indicator Light	When to service	When to replace
1 Fabric filter	none	Clean once every 14 days	Permanent
2 Carbon filter	none	Can NOT be WASHED	Replace every 3 months
3 True HEPA filter	Check Filter		Lasts up to 6~12 months

※ Intervals between filter replacement may vary depending on environment.

※ For optimal use, Fabric filter can be cleaned once every 14 days which can extend the life of other filters.

To purchase replacement Winix filters:

contact your local dealer

SAFETY AND CAUTIONS

Before operating this equipment, carefully read and follow these safety cautions

Ensure filters are inserted before running unit
running unit without filters can shorten the units life and cause electric shock or injury.

Be sure foreign objects are NOT inserted into the vents on the unit
objects can include pins, rods, and coins.

Do not touch any part of the interior of the unit with wet hands
the high voltage may cause electric shock.

Ensure unit intake and outlet vents do not become blocked
blockage may lead to increased internal termperatures causing product failure and derformation.

Do not use the unit as a step stool or place heavy objects on it
personal injury may occur or product failure and deformation.

⚠ WARNING Follow these instructions to reduce the risk of serious injury or death and to reduce risk of damaging the unit.

- ⚠ Do not pull on the power cord when unplugging the unit
- ⚠ If the unit becomes submerged in water, unplug it and contact customer service
- ⚠ Do not plug additional appliances into the same outlet or power supply
- ⚠ Unplug unit when not in operation for extended periods of time
- ⚠ Do not allow foreign objects such as pins, rods and coins to be inserted into the vents on the unit.
- ⚠ Do not tie or knot power cord when unit is in operation
- ⚠ Do not unplug or move the unit while in operation
- ⚠ Do not touch the plug with wet hands
- ⚠ Cord can become damaged by forcefully bending, pulling, twisting, bundling, pinching or placing heavy objects on it

※ If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

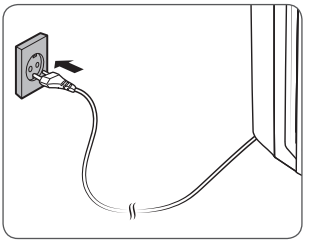

※ This appliance is not intended for use by a person (including children) with reduced physical sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

※ Children should be supervised to ensure that they do not play with the appliance.

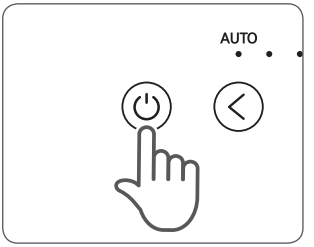

ZERO-N.indb 10 2018-04-26 오후 5:38:54

INITIAL OPERATION

① Insert the power cord into an electrical outlet.

② Press the 'Power' button.

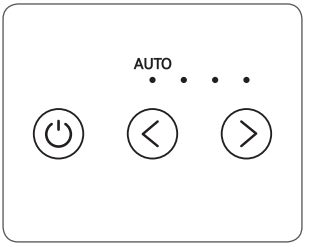

NOTE

- During the first 30 seconds of power up, the Air Quality Indicator will cycle through Blue, Amber and Red colors. The Particle Sensors take approximately 30 seconds to gauge the air quality in the environment, after which normal operation will begin.

③ By default, when the unit first powers on, the mode will be set to Auto enabled.

- When in Auto mode, the fan speed will be automatically adjusted according to the environments air quality.

NOTE

- In Auto mode, as the indoor air quality improves, the fan speed will automatically be reduced to Low.
- When the unit is running, you may hear a chirping or buzzing sound.

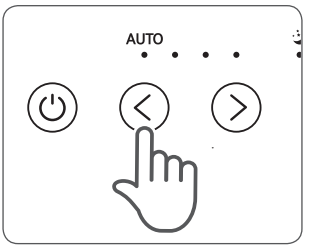

ZERO-N.indb 11 2018-04-26 오후 5:38:54

AUTO & SLEEP

1. Auto Mode

Enables auto operation based on the unit's air quality Particle Sensor.

① Press the Fan speed (UP/DOWN) button to select Auto mode.
- The LED 'Auto' light will indicate when Auto mode is activated, and operation will begin.

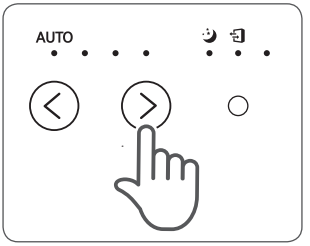

NOTE

- When in Auto mode the fan speed is automatically adjusted according to the indoor air quality. As the indoor air quality improves, the fan speed will automatically be reduced. If the indoor air quality decreases, the fan speed will automatically increase.

2. Sleep Mode

① Press the Fan speed (UP/DOWN) button to select Sleep mode.
- The LED 'Sleep' light will indicate when Sleep mode is activated, and operation will begin.

NOTE

- When Sleep mode is selected, the fan speed is automatically set to Low. The fan speed can be manually changed by pressing the Fan Speed button, changing the unit into manual mode.
- When Sleep Mode is activated, the Air Quality Indicator LED light is disabled.

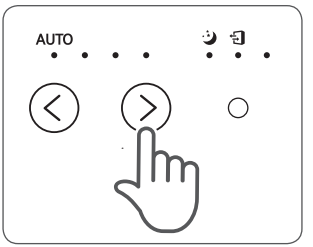

ZERO-N.indb 12 2018-04-26 오후 5:38:55

MANUAL & AIR QUALITY INDICATOR

3. Manual Mode (setting fan speed)

Users can optative to manually set the fan speed to Low, Medium, High.

① Press the Fan Speed button to set the desired fan speed.

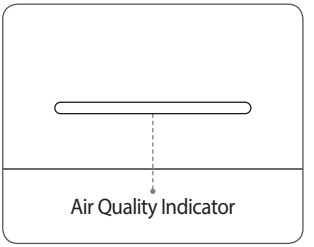

NOTE

- When Manual Mode is selected, Auto Mode is automatically disabled.

4. Air Quality Indicator

When on, the LED light will indicate the current indoor air quality according to three levels : BLUE (good), AMBER (fair), RED (poor).

NOTE

- Air quality level is displayed on the indicator, based on the Particle Sensors. Depending on the immediate environment, the indicator may change frequently in color or stay the same for lengthy periods of time.

ZERO-N.indb 13 2018-04-26 오후 5:38:55

FILTER CARE

1. About The Filters

When the Check Filter indicator LED is on, it is time to replace the True HEPA filter.

Filter	Indicator Light	When to service	When to replace
1 Fabric filter	none	Clean once every 14 days	Permanent
2 Carbon filter	none	Can NOT be WASHED	Replace every 3 months
3 True HEPA filter	Check Filter		Lasts up to 6~12 months

※ Intervals between filter replacement may vary depending on environment.

※ For optimal use, Fabric filter can be cleaned once every 14 days which can extend the life of other filters.

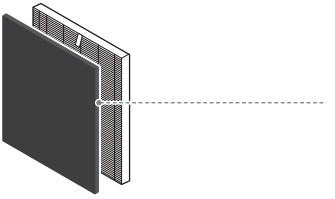

To purchase replacement Winix filters:

contact your local dealer

Filter R:

Carbon filter and Ture HEPA filter

NOTE

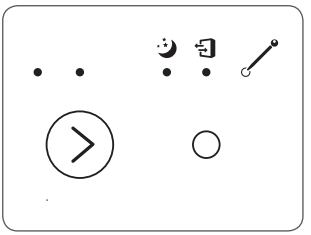

- The lifetime of a Filter is depending on the level of pollutants in the air. The more dust present in the environment, the more dust accumulates in the filters, shortening the life.
- If the filters are heavily soiled or have a bad odour, or if the fan strength is significantly weakened, replace filters even if the Change Filter indicator has not yet turned on.

ZERO-N.indb 14 2018-04-26 오후 5:38:55

FILTER CARE

2. Resetting The Unit

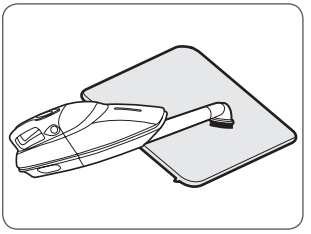

① After replacing the filters, turn the power back on and then use a thin object, such as a paper clip, to press the RESET switch for 5 seconds.

3. Cleaning the Fabric Pre-filter

Intervals between filter cleaning may vary depending on the air quality.

① Use a vacuum cleaner or soft brush to clean the Fabric filter. If it is excessively soiled, rinse in room temperature water.
- Do not use detergent or soap.
- Allow the filter to dry for 24 hours or more before using

※ If the Fabric Pre-filter becomes damaged or in any way needs replacement:
Please contact your local dealer

⚠ NOTICE

- Do not use benzene, alcohol, or other volatile fluids, which may cause damage or discoloration.
- The Fabric Pre-filter is reusable after cleaning, ensuring it is completely dry.
- Do not use hot water over 40°C or volatile fluids such as paint thinner.
- After washing the filter, allow it to dry completely in a well ventilated area. Otherwise, it may develop a bad odour.

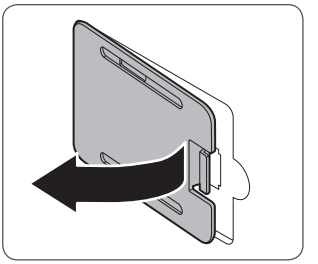

ZERO-N.indb 15 2018-04-26 오후 5:38:55

PARTICLE SENSOR CARE

Particle Sensors Care

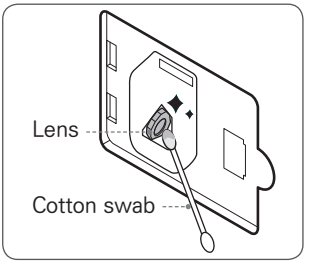

For optimal performance of the Particle Sensor, which detects airborne dust and ultrafine particles, clean it every two months. Clean it more frequently when the unit is running in a place with high dust levels.

① Open the Particle Sensor cover.

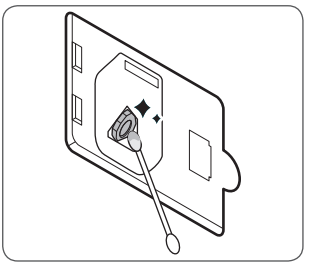

② Use a damp cotton swab to wipe the lens and intake area of the Particle Sensor.

- To clean the sensor area, use only water. Do not use volatile substances such as alcohol or acetone

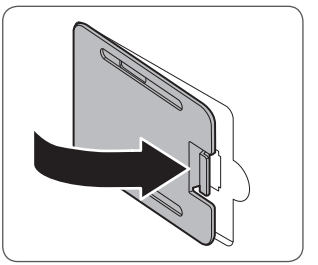

③ Wipe away any remaining moisture with a dry cotton swab.

④ Close the Particle Sensor cover.

- The Particle Sensors cover may be cleaned using a vacuum cleaner

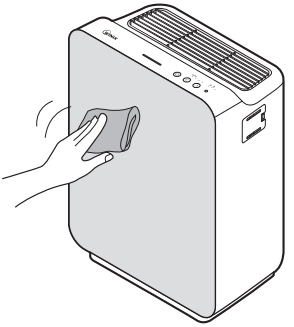

ZERO-N.indb 16 2018-04-26 오후 5:38:56

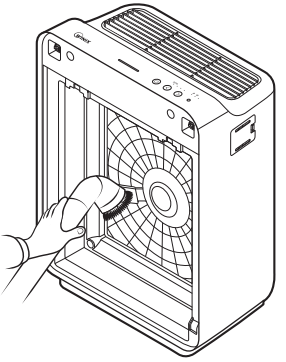

CLEANING CARE

1. Cleaning the Exterior & Interior

① Wipe with a soft damp cloth using room temperature water. Afterwards, wipe it down with a clean dry cloth.
- To keep unit in peak condition, clean every 1-2 months.

② Open the front panel and clean the interior with a vacuum cleaner.
- For optimal performance, clean every 1-2 months.

⚠ NOTICE

- When cleaning the unit, always unplug the power cord first and then wait until the unit has cooled down.
- Never disassemble, repair, or modify this unit yourself.
- Do not use flammable sprays or liquid detergents.
- Do not allow children to clean or maintain the unit.
- Before cleaning or maintaining, ensure unit is unplugged.

FREQUENTLY ASKED QUESTIONS

Problem	Check / Actions to take
It does not turn on at all.	• Is the plug securely attached to the outlet? – Make sure the outlet has power going to it, and ensure the plug is secured. • Is there a power outage? – Check to see if other lights and electrical equipment are working and try again.
It doesn't work in Auto Mode.	• Has Auto Mode been selected? – Press the Mode button until Auto Mode is selected. • Is the sensor blocked or clogged? – Wipe Odour Sensor with wet cloth, then dry.
It vibrates and makes a lot of noise.	• Is it running on a slanted or uneven surface? – Move the unit to a hard, flat, even area of the floor.
The power plug and outlet feel hot.	• Is the plug securely plugged in? – Make sure the plug is properly plugged into the outlet.

ZERO-N.indb 18 2018-04-26 오후 5:38:56

FREQUENTLY ASKED QUESTIONS

Problem	Check / Actions to take
There is a strange smell.	• Is it being used in a place with a lot of smoke, dust, or odours? – Clean the air intakes on either side and clean the Fabric filter. – Clean or change the filter.
The fan strength is weak. The unit is not purifying the air.	• Is the Check Filter indicator light on? – Change the filters as required.
The display panel is dim.	• Is the Light Sensor blocked by debris? – When Auto Mode is on, Sleep Mode is automatically activated when the Light Sensor detects that the room is dark.
